Business Case:

The product being developed is intended to provide drone users with a mobile app through which they can purchase and customise drones of their choice. The product's primary users will be those in the commercial industry, specifically those in security-related roles such as the police force and fire services. The drones will also be aimed at bird watchers, but they may also be available to drone enthusiasts who want to use the drones for recreational purposes.

The primary goal of the drones is to allow customers to customise them in terms of power, speed, and weight. Users can select an ideal body, engine, and propellor type to meet their specific requirements. The app's goal is to make these options as easy to navigate as possible, while also providing additional options such as checking compatibility across product types and personalising the drone.

Executive Summary:

The initial user case diagram, class diagram, and activity diagram are all part of the project backlog. Furthermore, the project team developed a SWOT and PESTLE analysis for the company to better understand unanticipated needs and desires. Furthermore, company benefits have been identified and discussed in both the project backlog and the company benefits section.

Wireframes will be used to create a mockup of how the mobile app will appear after the various configurations are displayed. It will also enable developers to comprehend the concept of business analysts in order to develop the product based on the requirements specified in the project backlog.

Business Case To-Be Model

The FlexDrone Company has developed a mobile app which enables its customers to create and purchase bespoke drones.

- ❖ The mobile app will allow customers to:
 - View saved templates and purchase history within their account page
 - Edit account details and delete their account
- ❖ Purchase from a mobile app with the need to set up an account
- ❖ Purchase a variety of individual products as sold by FlexDrone
 - Chassis
 - Engines
 - Propellers
 - Attachments
- ❖ Build a bespoke drone based on user specifications visualized using a 3D model
 - Drag and drop individual parts onto the 3D drone with a 360-degree view with the ability to drag and drop accessories
 - Be notified if the combination of parts is incompatible and a progress bar showing the status of the drone
 - Save drone templates to their accounts
- ❖ Add items to a shopping cart which can be viewed and edited on a purpose-built page
 - Be shown an alert upon item selection that FlexDrone does not offer commercial drone licenses
 - Be provided with a link to a third-party company for commercial drone licenses
- ❖ View cart at checkout
 - Be able to pay in a flexible manner at checkout by debit, credit card or PayPal
 - Customers to be alerted of the total amount of items in the cart before checking out
 - Customers to be able to pay in instalments
- ❖ Access a community page and Vlog page
- ❖ Be able to access FlexDrone social media link
 - Twitter
 - Facebook
 - Instagram

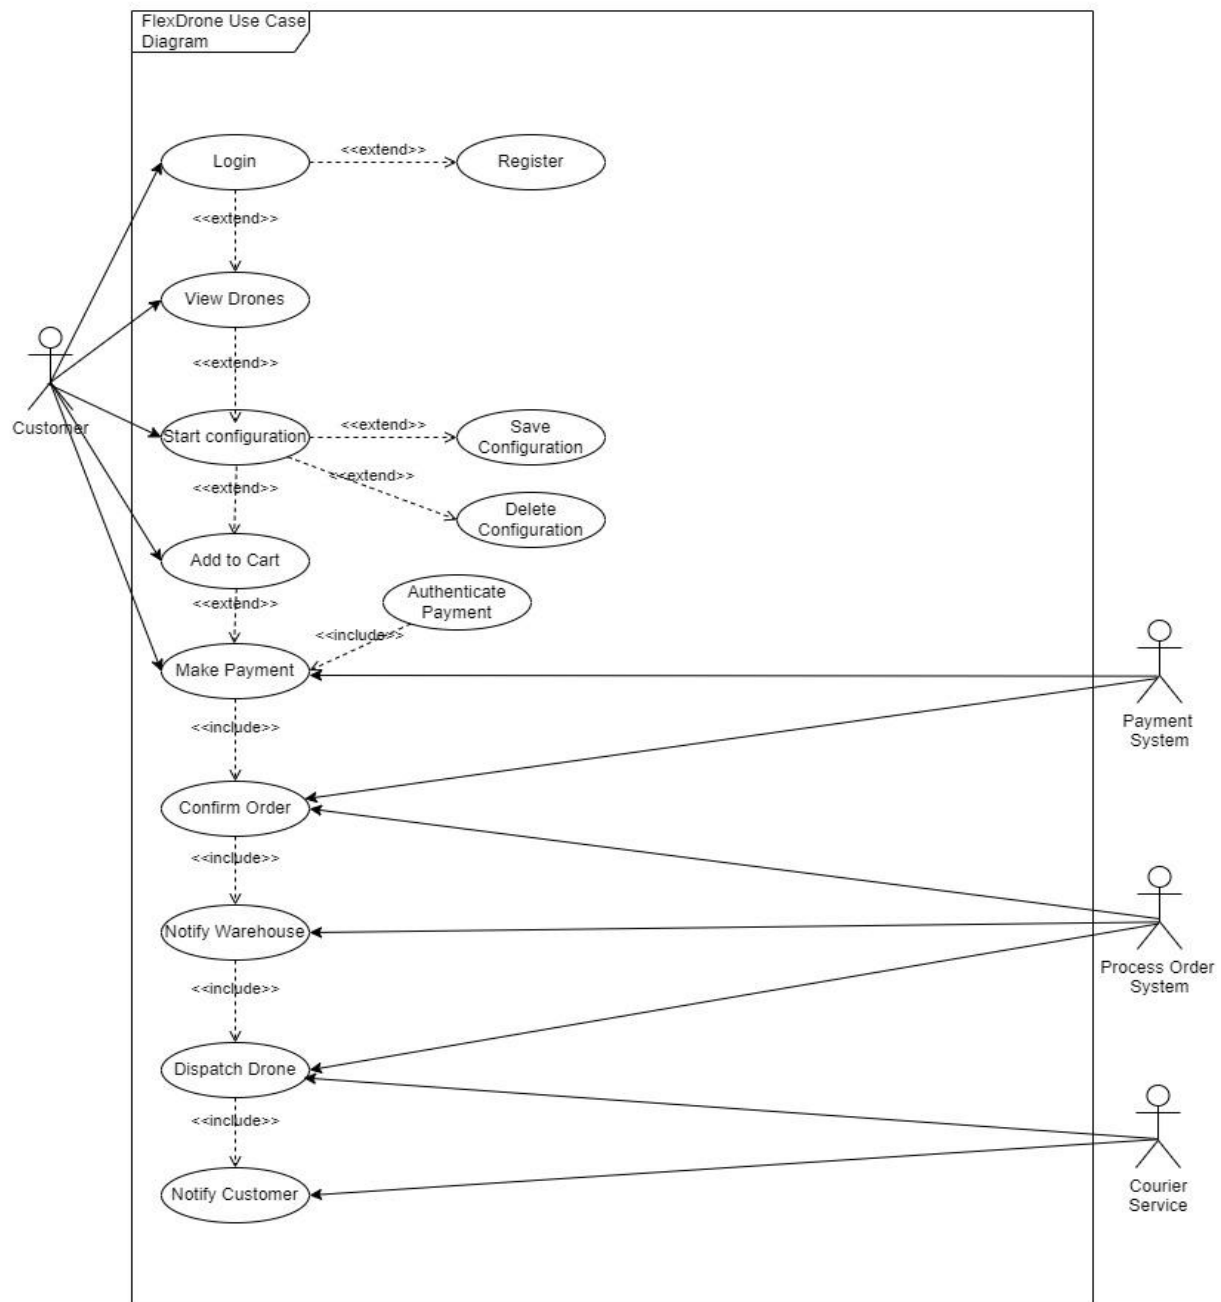

Project Plan:

Project Plan					
Deadline: 13/05/2022					
Status	Phase	Due By	Day No.	Allocated to	Notes
Done	Create Questions for Interview	10/5/2022	1	John, Ella, Holland, Oscar, Stella, Zhasmina	Adjust per SCRUM Meeting
Done	Create Kanban Board	11/5/2022	1	John, Holland	Collect requirements - Order using MOSCOW
Done	Email CEO John Seager to arrange interview	10/5/2022	1	John, Ella, Holland, Oscar, Stella, Zhasmina	
Done	Interview CEO John Seager	11/5/2022	1	John, Ella, Holland, Oscar, Stella, Zhasmina	
Done	Stakeholder Management and Analysis	11/5/2022	2	Zhasmina, Stella	Power/Interest Matrix
Done	Establish Product Backlog	11/5/2022	2	Oscar	Creating requirements backlog with user stories
Done	Establish Sprint Backlog	11/5/2022	2	John, Holland	Labelling sprint no. in line with product backlog
Done	Validate Requirements with stakeholders	11/5/2022	2	Ella, Oscar	
Done	Create Activity Diagrams	12/5/2022	2	John, Zhasmina	
Done	Create Wireframes	12/5/2022	3	Zhasmina	
Done	Create Class Diagrams	12/5/2022	3	Zhasmina, Stella	
Done	Construct RAID Log	12/5/2022	3	John, Holland	
Done	Construct RACI Chart	12/5/2022	3	Oscar	
Done	Construct Use Case Model	12/5/2022	3	Ella, Oscar	
Done	To-Be Model	12/5/2022	3	Ella	
In Progress	Appendix	12/5/2022	3	John, Ella, Holland, Oscar, Stella, Zhasmina	Questions for interview, Kanban board, Emails
To Do	Create Presentation	12/5/2022	3	John, Ella, Holland, Oscar, Stella, Zhasmina	

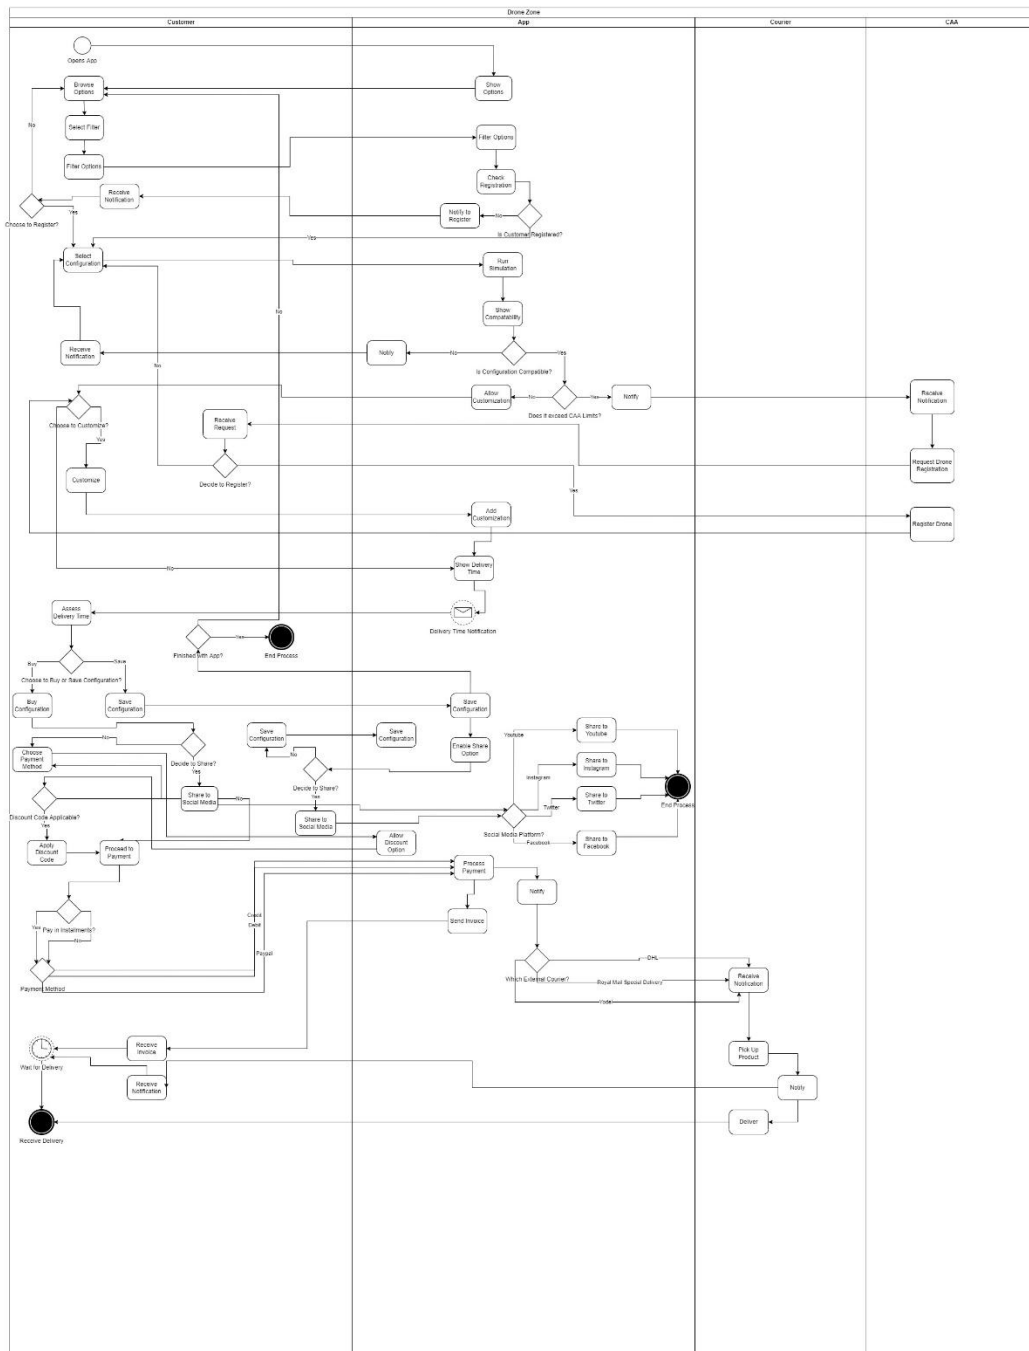

Product Backlog:

Product Backlog						
No.	AS A	I Want	So That	Priority	Sprint	
1	Customer	To login by registering an account on the app	I can create and customise a drone	Must have	1	
2	Customer	To save searches and templates on the app	I can track progress on a created model	Must have	1	
3	Customer	A search bar and options to filter requirements	I can browse the app even without an account	Must have	1	
4	Customer	To be able to edit account details	I can change billing and shipping information	Must have	1	
5	CEO	A message when a customer is choosing a product alerting them that licensing is not provided	They can look for licensing on a third-party website with the link we provide	Must have	1	
6	CEO	Aesthetic personalisation option such as logos or text	The logo and interface includes blue and silver	Must have	1	
7	Customer	Flexible card payment options	We can pay via credit cards and Paypal	Must have	1	
8	CEO	A message showing if accessories of the drone models are incompatible in a shopping cart	Customers are aware if they are creating mispecified models	Must have	1	
9	CEO	To create a drop-in recycle or trade used drones	Customers can use that for their next purchase	Must have	1	
10	Customer	A 3D model and a 360 degree view with the ability to drag and drop accessories	We can get a clear picture of the model we are constructing	Must have	1	
11	CEO	The prices to be made clear under each item	Customers know how much their totals will be before checking out	Must have	1	
12	CEO	A FAQ and review/feedback form section	The customers are updated on important information such as delivery time	Must have	1	
13	CEO	An App design that is sleek and professional	We do not have a tacky image	Must have	1	
14	CEO	A page where customers can share vlogs and experiences using their drones	Customers can learn from one another on usage	Must have	1	
15	CEO	Social media links	Customers can interact with us on the site and personalise our relationships with them	Must have	1	
16	CEO	A client page showing models they have purchased and their experience	To show success and trust built with prior client to encourage new users through Vlogs and I	Should have	2	
17	CEO	A refund policy page	Customers are aware of our 90-day policy and are not misled	Should have	1	
18	Customer	To have payment plan options	I can make payments in instalments	Must have	1

Benefits Realisation:

The introduction of the mobile app is expected to be a positive driver in increasing Flexdrone revenue in the coming years. The company expects to see an increase in customer interaction as a result of using the app, which could be a driving factor in increasing revenue. The bespoke drone customisation on the customer purchase page will demonstrate the demand for the types of drones and may act as a method of converting potential customers into buyers. Furthermore, customers will be enticed by the finished product look through the customisation page and be more motivated to purchase the drone.

The mobile app will help the company expand its reach throughout the United Kingdom and Europe. The app will provide access to large audiences that were previously inaccessible due to a lack of an app presence. Due to the simplicity of the app, customers will find it easy to navigate and purchase goods. This will allow customers to feel comfortable using the app and thus increase the potential for purchasing goods.

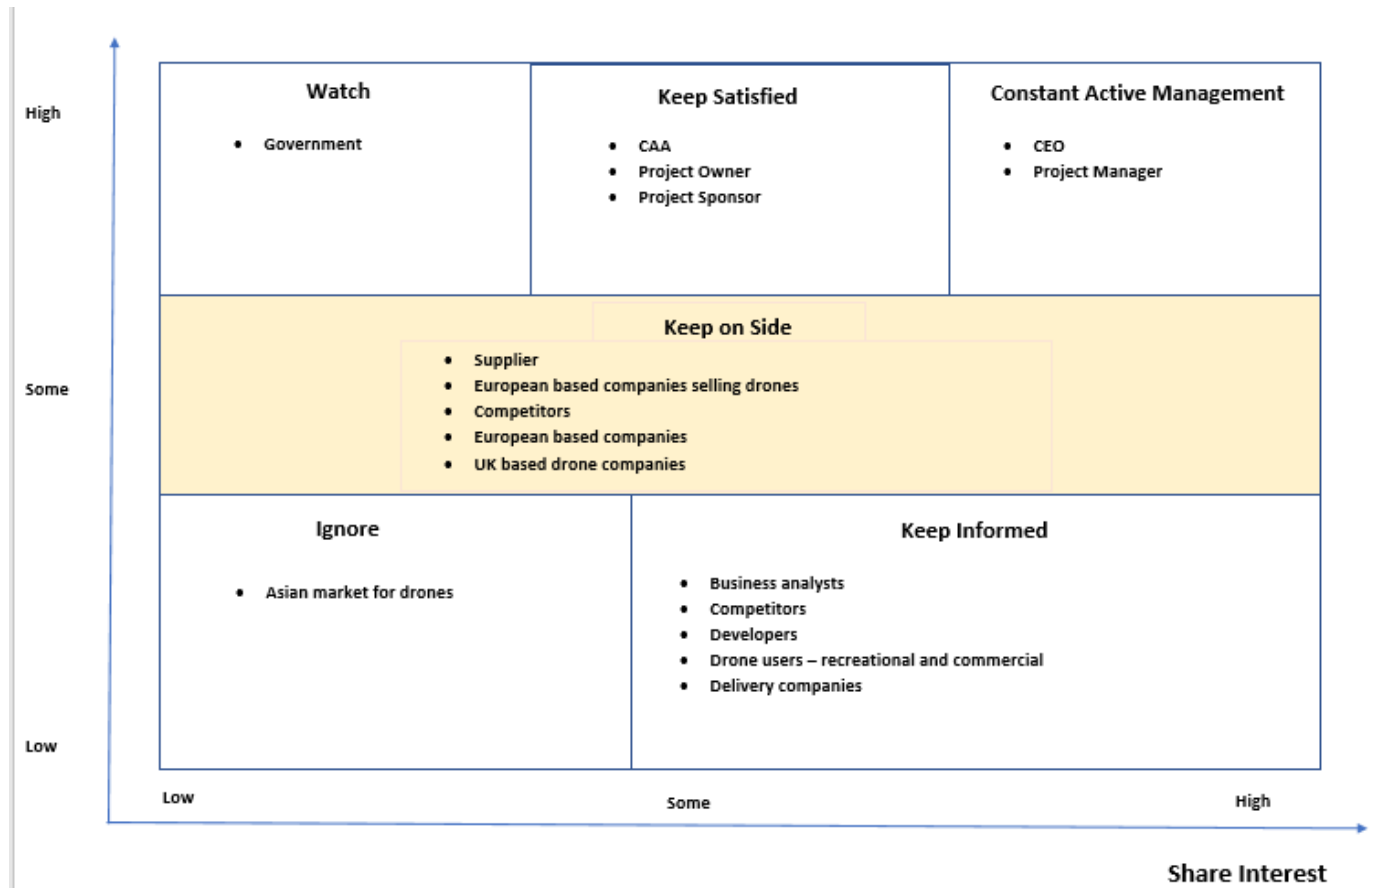

The ability to use the app anywhere will allow customers to design and customise their drone concepts at any time or place.

The app will also serve as a marketing tool by connecting social media users and acting as a great ambassador to be shared across various social media platforms. The social media channels reach a larger audience at a low cost and in an efficient manner for our company, which could aid in increasing brand awareness. The creation of a page for customers to share their Vlogs and experiences will boost brand reputation while also providing a marketing opportunity. Overall, the app will allow the company to plan its marketing strategy through social media platforms, which could be a driving factor in a cost-effective way to reduce marketing costs while increasing brand awareness and revenue for the company.

RAID Log:

RAID Log									
Category	Description	Probability	Impact	Risk Value	Mitigate Risk	Post Probability	Post Impact	Post Risk Value	
Risk	Team member becomes unwell	2	4	8	Ensure team member follows NHS guidelines on staying healthy	1	4	4	
Risk	Internet Disruptions	3	5	15	Ensure each team member regularly communicates updates on work	1	5	5	
Risk	Resource Bottlenecks	4	4	16	Ensure work is split up evenly	2	4	8	
Assumption	Customer can interface with app	2	5	10	Prototyping and testing before release	1	5	5	
Assumption	Budget for project remains the same	4	2	8	Regular communication with stakeholders	3	1	3	
Issues	Team member had to leave early. Leaving team a person down	4	3	12	Communicate with all team members to discuss potential times that they have to leave	4	2	8	
Issues	Not obtaining all requirements from CEO	4	4	16	More meetings with CEO	4	2	8	
Issues	Discrepancy between Project name and App name	4	4	16	Correspondence between CEO, project team and app developers	5	2	10	
Dependencies	Developers following mandate for app creation	5	5	25	Provide clear instructions and regular update meetings to ensure app is on track	2	5	10
